**Subject:** Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kevin J. Martin  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Sheryl Goedken

From: SDBAILEY@fcc.gov  
Subject: OSCAR change - Capability to serve both wireline and wireless carriers

Good afternoon, everyone....

OSCAR has been updated to now allow the serving of a case to both a wireless and wireline carrier at the same time. In order to add this change Ken had to add a new checkbox under the apparent carrier field called:

<<< Check here if you wish to serve both a Wireline and Wireless carrier.

This checkbox is also in the quick entry screen but is called:

Serve Wireless and Wireline??

If you check this checkbox, all carriers will be displayed when you click the dropdown to select the carrier. If you do not select this carrier, the system will lookup the complaint type to display the appropriate carrier. This change is effective now...

If you have any further questions, please see your supervisor. thanks, s.

My name is Dawn Campbell. I am very concerned about this MAJOR problem. I know that when I try to use my cell phone in a dead area it is frustrating, but when I use my phone it isn't a matter of life or death. I can only imagine how the police department and other men and women trying to save lives when they need to relay a message and can't get through. They must utterly feel helpless as we all did during September 11. Please don't let this happen anymore with the problems of the cell phones and other equipment that Emergency response teams, may need in the future. Suppose another attack on the United States occurred and we were not able to get the help that we would need due to an interference caused by cell phones. It seems to me that this problem shouldn't be a problem at all! I know that I am only one person, but I want to help. I hope this letter made a dent! Thank you for your time.

Sincerely,

Dawn Campbell 1524 Bancroft Avenue Colonial Beach, VA 22443-3015 804-224-2286

Chairman Michael K. Powell  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Chairman Powell,

my name is corinne, I am wife of a fire fighter and I know what it is like to know several people on my husband's city department and I worry about the fire fighters and the police and I would like to help out if I can and can I get more info on it please. I worry about the firefighters so much after sept 11th and I don't like knowing that emergency personell can't get through on their radios to call for help because of the interference I want to make sure thet have a way for calling for help.

Sincerely,

Corinne Marcucci p.o.box 958 Brookings,OR 97415

Chairman Michael K. Powell  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Chairman Powell,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Kristie Lewis
